

The Scandal of the Century

How Election Was Stolen

Analysis Shows Obvious Fraud By Computer in States of GA, PA

Woody Jenkins
 Editor

CENTRAL — Election Day in the United States, held this year on Tuesday, Nov. 3, 2020, was really a series of 51 separate elections — one in each of the 50 states and the District of Columbia. The vote total in each determines how the electoral votes of that state or district will be cast in the Electoral College on Dec. 14, 2020.

Thirty of those states and more than 2,000 counties have something in common. The citizens of those areas vote on voting machines provided by Dominion Voting Systems with software from Smartmatic Vote Counting System.

While supporters of President Trump cast about for evidence of vote fraud in the form of unsigned ballots, mishandled paper ballots, and evidence of “retail” vote fraud,

President Donald Trump

Former Vice President Joe Biden

While the mainstream media has crowned former Vice President Joe Biden as “President-elect,” the facts on the ground are quite different, at least in two swing states that have been called for Vice President Biden — Georgia and Pennsylvania.

In those two states, a careful analysis of the data shows that both states voted for President Trump and the election was stolen.

It was fraud by computer. Since Dominion and Smartmatic have control of the voting machines, the software, and the reporting of the results, it should be up to the owners and officials of those two entities to explain how it was done. But it was done, as will be shown.

Unraveling this mystery begins with *The New York Times*. After polls closed on Election Day, *The Times* begin to report the results hour after hour. The coding for that data is still online, and we have downloaded it in case it is taken down.

The data from *The Times* shows the time, expressed as UTC, or Universal time, which is Greenwich mean time in England.

It also shows the totals for Trump and Biden, Trump’s lead, and then new votes for Trump and Biden as each change in the results was uploaded. Then it shows something very significant: The increase or decrease in votes.

Fake Votes Were Reported in Multiples of 4,800 Votes in GA, 6,000 in PA in Identical Fashion

proof of massive computer-based vote fraud is right before the nation’s eyes. It is going unnoticed in this hyper-partisan atmosphere.

Ironically, *The New York Times*, a vocal critic of the President, has recorded the fraud for all times, even though they have not reported it.

New York Times Election Report Reveals 104,984 Stolen Votes in Ga, 347,768 in PA

Millions of Mail Ballots Made It Impossible to Track Which Votes Were Being Tabulated

Woody Jenkins
 Editor

CENTRAL — After every election, the *Central City News* publishes precinct-by-precinct voting returns to let our readers know how the people of Central voted. In preparation for this issue, we did that once again. However, we found the data to be virtually useless.

Nearly 100,000 voters in East Baton Rouge Parish took part in early voting or voted by mail. Those votes are not attributed to the voter’s home precinct but simply lumped in with other votes from across the parish. As a result, the only thing we can report on a precinct basis would be the votes cast on election day itself, which is a far cry from reality.

Additional Votes for Joe Biden received in multiples of 4,800 = 104,984

AN AMAZING CONSISTENCY IN REPORTED RESULTS — At 16:35 UTC on Wednesday, Nov. 4, 2020, President Trump was leading Joe Biden in the State of Georgia by 103,997 votes. Over the next seven days, Biden picked up 104,984 votes from 16 vote dumps. Amazingly, all of the vote dumps were either 4,800 votes each or a multiple of 4,800. The same thing happened in Pennsylvania, where a series of 44 vote dumps in multiples of 6,000 each resulted in 347,786 votes for Joe Biden.

Georgia: When Ballots from Nowhere Arrived in Multiples of 4,800 Votes

Continued from Page 1

cease in the lead for Trump after the new dump of votes occurred. Therein lies this story.

Late on Wednesday, Nov. 4, at precisely 16:35 UTC, *The New York Times* reported President Trump was leading in Georgia by 103,997 votes. However, a new group of votes was being dumped. That one dump reduced Trump's lead by 18,563 votes. Remember that number.

Three hours later, another dump occurred. This one reduced Trump's lead by 4,656 votes. Remember that number. Thirty minutes later, another dump reduced Trump's lead by 4,685 votes. An hour and a half later, another dump reduced Trump's lead by 9,323 votes. An hour and a half later, another dump reduced Trump's lead by 9,509 votes.

Are you beginning to see a pattern?

The pattern is that all the dumps were multiples of 4,800.

But it didn't end there!

An hour and 26 minutes later, another dump reduced Trump's lead by 9,501 votes. At that point, Trump's lead had been reduced to about 48,000 votes.

Then an hour and 8 minutes later, a vote dump reduced Trump's lead by 9,606 votes.

An hour and 34 minutes later, a vote dump reduced Trump's lead by 4,827 votes.

Forty minutes later, a vote dump reduced his lead by 4,861 votes. Then 2 hours and 26 minutes later by 4,863. Four hours and 47 minutes later, a vote dump reduced Trump's lead by 4,864 votes. Biden was coming on strong!

Trump's lead was now only 9,625 votes. It was 10:53 UTC on Nov. 5.

Bear in mind that while all this was happening, Trump was gaining votes or holding his own if you exclude the vote dumps.

Georgia was hanging in the balance, but not for long. Five hours later, a vote dump cut Trump's lead by 4,891. Five hours after that, a vote dump cut Trump's lead by another 4,913. At 21:58 UTC on Nov. 5, less than a thousand votes separated the candidates.

An hour later, a vote dump reduced Trump's lead by 4,916 votes, and two hours and 32 minutes later, the vote dump reduced Trump's lead by 4,953 votes.

The election was tied with each candidate having 2,447,591!

At 22:00 UTC, Nov. 6, a vote dump cut Trump's vote by 4,969, and Biden led 2,454,662 to 2,449,693, a lead of 4,969.

The final vote dump came at 23:52 UTC on Nov. 7, when Biden's lead widened by 4,983! The former Vice President had made an amazing comeback and was now

leading by 10,000 votes!

Of course, the statistical possibility of Biden picking up multiples of 4,800 votes 16 times during this four-day period would be firmly in the impossible range. But it happened.

How did it happen? There is no possible explanation except vote fraud — fraud by manipulation of computer programs.

This is all the more obvious in view of the fact the average of 4,800 or multiples thereof not only happened by adding votes to Biden but also by subtracting votes from Trump. The computer had to be programmed to produce net

votes for Biden without being obvious. And they would have succeeded, if *The New York Times* had not kept such timely records and if somebody had not done some calculations.

The fraud in Georgia is all the more significant when one considers that exactly the same thing happened in Pennsylvania, except that the computer was programmed to add 6,000 votes at a time instead of 4,800.

In both states, the "votes" counted were not the votes of real people. They were simply added digitally, which a complete recount of both states would detect.

At 16:35 UTC on Wednesday, Nov. 4, *The New York Times* reported President Trump was leading in Georgia by 103,997 votes. Then the Times' continuous voting updates showed ballots arriving for Joe Biden in multiples of 4,800 votes over and over again. In some vote dumps, the President actually lost votes. This unprecedented consistency in vote totals continued until Biden had gained 104,984 votes in multiples of 4,800. At the same time, in Pennsylvania, Biden benefited from vote dumps in multiples of 6,000 votes, totalling 324,000.

Pennsylvania Also Suffered Vote Fraud But by Multiples of 6,000 or 12,000

Continued from Page 1

porting how Central voted. With roughly half of all votes being reported as part of a parishwide total, it is impossible to determine where most votes are coming from.

In larger states such as Georgia and Pennsylvania, which had millions of early votes and mail-in ballots, the problem was even greater. The public was told for days after the Nov. 3 election that “votes are still being counted.” However, as new vote totals were uploaded, neither the public nor the media knew where those votes were from.

Fear generated by the virus created an acceptance of the widespread use of mail ballots, but there was no corresponding effort to insure that those ballots were being collected and counted honestly and correctly. On the contrary, some states including Louisiana, actually reduced normal security safeguards on mail-in ballots.

In the aftermath of the Nov. 3 vote, the media never told the public how or why it was necessary to still be counting ballot days after Nov 3. The confusion and uncertainty of the “new normal” in elections led to acceptance of votes being uploaded without knowing where they came from.

On Election Day, in the Commonwealth of Pennsylvania, Donald Trump took an early and commanding lead.

By 22:54 UTC Nov. 4, President Trump was leading former Vice President Joe Biden by roughly 285,000 votes. However, that began to disappear as someone, somewhere began to dump “votes” into the system. There were 44 separate vote dumps, resulting in 347,768 votes being put into the system — all in increments of 6,000, 12,000, or 18,000 additional net votes for Joe Biden.

The remarkable consistency of the votes added to Joe Biden’s totals has shocked even Democratic office holders who have seen *The New York Times*’ election data.

It was quite a feat for Joe Biden to come back from an election night defeat by 285,000 votes to a 46,000-vote margin of victory four days later. Election fraud has been around a very long time. However, election fraud by computer is something relatively new.

This election is proof that much more work will be necessary to insure free and fair elections in the future.

Additional Votes for Joe Biden received in multiples of 4,800 = 347,768

Giuliani: We Have Someone in Dominion

Rudy Giuliani
Attorney for President Trump

“We have a person inside Dominion who has come forward and signed an affidavit that Dominion observed the hundred thousand phony ballots that were brought in at four o’clock in the morning on Nov. 5 that were all Biden ballots.

“They appeared by every measure to be phony ballots, since they were brought in the back door, they were not in the proper containers, they were sticking out of paper bags and cardboard boxes.

(The Dominion insider) was told they were ballots that were needed to ‘catch up to Trump’ because Trump was ‘too far ahead’. When they were counted, they were all counted in favor of Biden. The woman from Dominion testified un-

der oath that she saw not a single vote for Trump from among these, and she was there for four or five hours. She said it appeared to her to be horribly corrupt, and when she reported it, nothing was done about it. She was told it wasn’t any of their business.

So that’s why I feel pretty good about our lawsuit in Michigan. There’s a 100,000 vote fraud right there (snaps fingers).

Do we have other witnesses who are somewhat reluctant to come forward right now? Yes. We can probably corroborate this three or four times.

So I think they’re finished on that. I think that’s something that actually happened, they brought a hundred thousand votes in, they were all Biden votes.

There was not even another vote for another

Rudy Giuliani
President Trump attorney

Democrat. And it was intended because they were panicked because Trump was ahead by much more than they anticipated.

The same thing happened in Pennsylvania. It’s inherently impossible to make up for (a margin of) 800,000 votes at 64 percent of the votes tallied).

You have to cheat to do it. Philadelphia has cheated in every election in the

last 60 years. Philadelphia has more people who have gone to jail for election fraud than probably anywhere else in the country. And it’s all Democrat election fraud, because it’s been controlled by a corrupt Democrat machine for the last 60 years.

So when they fell behind by 800,000 votes, they went into a state of panic. So they had to shut out all the Republicans. They had to bring in all the phony ballots.

We never got to examine over 600,000 ballots, which makes them all unlawful — Illegal, unlawful, fraud, fraudulent.

I doubt the (Supreme) court will allow them to count those ballots. I’m sure the state legislature will not accept those ballots in order to certify electoral votes.
